# Phat "Teddy" Nguyen Hong, Full-Stack TypeScript Developer

An ambitious software engineer who has always wanted to be part of something enormous.

With a strong passion for computer science, I've learned about complex algorithms such as Recursion, Back Tracking, and Dynamic Programming since I was 14 and have participated in many competitions since then. My highest achievement was the first prize in a provincial contest, and I was one of the six students to present Long An province to participate in the national tournament of Vietnam. During my hard studying time at university, I helped the IT team and my lecturer to maintain the question bank system, and during my three years of working, I have joined many projects with different scales of complexity. In 2023, I'm looking forward to a job overseas to begin a new journey, face new challenges, and participate in new projects that have impacted many more people than I have been able to.

## Employment History
